# Table of Contents

<b>1. High-Frequency Ventilation (HFV)</b>	<b>6</b>
1.1. Definition	6
1.2. Clinical Application	6
<b>2. Historical Development of High-Frequency Ventilation</b>	<b>6</b>
<b>3. Technical Principles of High-Frequency Ventilation</b>	<b>7</b>
<b>4. Forms of High-Frequency Ventilation</b>	<b>10</b>
4.1. High-Frequency Positive Pressure Ventilation (HFPPV)	11
4.2. High-Frequency Jet Ventilation (HFJV)	12
4.2.1. Supraglottic and Infraglottic High-Frequency Jet Ventilation	12
4.3. Superimposed High-Frequency Jet Ventilation (SHFJV)	15
4.4. High-Frequency Oscillatory Ventilation (HFOV)	17
<b>5. Clinical Applications of Superimposed High-Frequency Jet Ventilation (SHFJV) in Operative and Interventional Medicine</b>	<b>20</b>
5.1. ENT Surgery	20
5.2. Thoracic Surgery	20
5.3. Interventional Bronchology	21
5.4. Cardiology	22
<b>6. Setting Ventilation Parameters for Operative and Interventional Procedures with SHFJV</b>	<b>22</b>
6.1. SHFJV Settings	22
6.2. Baseline Settings for SHFJV	22
6.3. High-Frequency Jet Ventilation in Laryngeal and Tracheal Airway Stenoses	23
6.3.1. Parameter Settings for Laryngeal Airway Stenoses and Supraglottic HFJV/SHFJV	23
6.3.2. Adjustment of Ventilation Parameters in Tracheal Airway Stenoses and Infraglottic High-Frequency Jet Ventilation (HFJV)	24
<b>7. Accessories</b>	<b>25</b>
7.1. Jet Applicators	26
7.1.1. Jet Laryngoscope / Jet Bronchoscope	26
7.1.2. Jet Converter	28
7.1.3. Jet Ventilation Catheters	28

<b>8. Monitoring and Safety Management</b>	<b>30</b>
8.1. Monitoring Parameters	30
8.2. Additional Monitoring	32
8.3. Alarm Management	32
8.4. Safety Requirements in Laser Procedures	32
<b>9. Clinical Applications of Superimposed High-Frequency Jet Ventilation (SHFJV) in Intensive Care Medicine</b>	<b>33</b>
9.1. Pulsatile BiLevel Ventilation (p-BLV)	33
9.2. Ventilator Settings for Acute Respiratory Failure (ARDS) Using p-BLV – Example: TwinStream ICU	37
<b>10. Respiratory Gas Conditioning</b>	<b>39</b>
<b>11. Jet Ventilation Systems and Applications: The Example of Carl Reiner TwinStream High-Frequency Jet Ventilators</b>	<b>40</b>
<b>12. Standard Operating Procedures (SOPs)</b>	<b>44</b>
• Interventional Bronchoscopy with Rigid Jet Bronchoscopes	44
• Interventional Bronchoscopy with ETT or LMA and Jet converter	46
• Laryngeal procedures performed with a jet laryngoscope	48
• Laryngeal procedures using a jet ventilation catheter	50
• Use of jet converter during single-lung ventilation (SLV)	52
• Jet ventilation catheter for use in central airway procedures (trachea)	54
• Jet Converter in Cardiology for Optimized Respiratory-Dependent Motion Management	56
• Jet converter in liver ablation for optimized respiration-dependent motion management	58
• Jet converter for kidney stone fragmentation to optimize respiration dependent motion management.	60
• Supraglottic high-frequency jet ventilation (SHFJV) using a jet laryngoscope or jet bronchoscope in laryngeal surgery and bronchoscopy	62
• Supraglottic SHFJV using the jet converter with endotracheal tube (ETT) or laryngeal mask airway (LMA) for interventional procedures	63
• Infraglottic HFJV or SHFJV using a jet ventilation catheter for surgical procedures on the trachea (tracheal resection) and larynx	66
<b>13. Terminology and Abbreviations</b>	<b>67</b>
<b>14. Summary</b>	<b>68</b>
<b>15. References</b>	<b>68</b>
